SUGAR REFINERIES TO PRODUCE CELLULOSE

WILL ALSO PRODUCE CHALK -- Ljubljana Slovenski Porocevalec, 25 Jul 50

According to the suggestion of Engineer Mautner, Yugoslav sugar refineries, which otherwise would be idle for several months between sugar seasons, have begun to produce cellulose from straw and other annual plants. It is believed that several hundred million dinars in foreign exchange will be saved in this manner.

The Yugoslav sugar factories have also begun to produce precipitated chalk from slaked lime. The chalk is used in the rubber, cigarette paper, and cosmetic industries.

CELLULOSE FACTORY BEGINS OPERATION -- Ljubljana Slovenski Porocevalec,
31 Jul 50

On 27 July all the departments of the new cellulose factory in Prijedor began operation.

The factory consists of six large shops, three small shops, and one thermal power plant. Each of the wood-boilers is 11 meters long and 5 meters wide. Altogether they can process 350 cubic meters of wood simultaneously.
